Community Health Assessment Results

On February 20, 2016, the Neighborhood Health Survey was conducted in the Fairbanks neighborhood. People who responded to the survey were 18 years of age or older and a resident of the neighborhood. To ensure we reached our target population, this survey was administered door to door. The survey consisted of 94 questions related to various health concerns.

This document highlights the survey results. A total of **50** surveys were collected from the neighborhood. About 62% of the respondents were female and 38% male. Most (69.3%) of the respondents were older than the age 34. All the respondents lived in the neighborhood for at least a year.

LENGTH OF TIME IN THE NEIGHBORHOOD
